Israel 1948—2026: A fractal measurement of governance.

Independent academic research · Data Fluidity methodology · 84,100 measurement points

ABSTRACT

This research applies the **Data Fluidity** methodology developed by Ehud Hemli to the systemic quantification of governance. The F score (value fluidity; $F = D \times U / R$) is computed for 78 years of Israeli governance across five units of analysis: 13 prime ministers, 15 public systems, 48 social sectors, 100 largest companies, and 30,000 NGOs.

Raw data was collected from **16 primary sources** (CBS, Bank of Israel, State Comptroller, Israel Securities Authority, Registrar of Companies, OECD, IMF, V-Dem, and others), cross-verified and normalized into **84,100 measurement points**, and computed through the 17 sub-indicators of the methodology. Numerical results begin at section 05. All algorithms and data are fully reproducible.

01 About the research

What this is. A quantitative report on 78 years of Israeli governance, 1948—2026. Each unit of analysis — prime minister, public system, social sector, company, NGO — receives a single score (**F**) summarizing 17 sub-indicators, all drawn from open and verifiable primary sources.

Why it is needed. Public debate about government performance tends to be dichotomous (good/bad), event-driven (one defining event), or partisan. This research examines systemic function — consistent across periods, across units of analysis, and independent of political identity.

What is new. Uniform application of the Data Fluidity methodology across five parallel units of analysis; direct comparison of all 13 prime ministers on identical metrics; contribution-vs-extraction (NCR) analysis of the 100 largest companies and 30,000 NGOs; full reproducibility (code + data).

What this is not. Not a legal judgment. Not an assessment of individual intent. Not a substitute for public elections. A synthetic index intended to support evidence-based debate, not to close it.

Who wrote it. Independent research by udihem78@gmail.com under the MIT license. The researcher has no affiliation with any party, government, or public institution. The 40 source documents, 17 calculation algorithms, and raw data are publicly available at github.com/udihem78-maker/animated-eureka.

02 Methodology — how we measure governance

The core idea

Governance, at any level, is the process of translating decisions into public benefit. The smoother and more efficient that translation, the better the function. Ehud Hemli's **Data Fluidity** methodology quantifies this flow in three components:

COMPONENT	WHAT IT MEASURES	HIGH SCORE =	LOW SCORE =
`D` Decision quality	Quality of decisions made	Evidence-based, coordinated, deliberate	Impulsive, political, uncoordinated
`U` Utility realized	Public benefit actually delivered	Decisions reach the public and have effect	Decisions remain on paper
`R` Resistance	Systemic friction along the path	Smooth, efficient bureaucracy	Entangled, wasteful, blocking bureaucracy

The formula

The composite score for each unit of analysis: `F = (D × U) / R`. The better the decisions (D) and the greater the realized utility (U) relative to friction (R), the higher the F score. Scale: **0 to 100**. A score of 100 = ideal system (not observed in practice). Above 25 = functional governance. Below 12 = collapse threshold.

The 17 sub-indicators

The D, U, R components themselves are composed from 14 sub-indicators — 17 quantitative metrics in total. Each metric is computed from 3 to 15 raw data points drawn from primary sources.

`F` Fluidity · `D` Decision quality · `U` Utility realized · `R` Resistance / friction

`PEP` Public Equity Pressure · `DBR` Decision-Benefit Ratio · `NSV` Net Social Value

`CBD` Cost-Benefit Delta · `FAI` Fiscal Alignment Index · `GQS` Governance Quality Score

`CBE` Cross-Boundary Effect · `BE` Behavioral Elasticity · `ID` Indirect Damage

`FO` Future Opportunity · `I` Information quality · `P` Process friction

`NFI` Net Fiscal Impact · `SR` Social Resilience · `NCR` Net Contribution Ratio

Full definition, formula, and sources for each metric: methodology/README.md.

03 Measurement process & data sources

Working process · five steps

01 **Collection.** Raw data pulled from 16 primary sources (listed below). Original pulls, no intermediate aggregators.

02 **Cross-verification.** Every figure confirmed against at least two independent sources. Discrepancies are documented, not smoothed over.

03 **Normalization.** Currencies converted to 2026 ILS, CPI-adjusted, demographically and period-adjusted.

04 **Computation.** The 17 measurement algorithms are applied to the normalized data. Open source under MIT license.

05 **Aggregation.** F score composed from D, U, R components for each of the 1,350 units of analysis.

16 primary sources

[01] Israel Central Bureau of Statistics (CBS) — statistical yearbooks, 1948—2026

[02] Bank of Israel — annual reports and banking-system breakdowns

[03] Office of the State Comptroller — 85+ annual reports, 1995—2026

[04] Israel Securities Authority — public-company filings and prospectuses

[05] Registrar of Companies — ownership structures and control changes

[06] Knesset website (knesset.gov.il) — protocols, votes, parliamentary queries

[07] State Attorney's Office yearbooks — conviction rates and investigation duration

[08] OECD Economic Surveys of Israel (2001—2024)

[09] IMF Article IV Consultation Reports — Israel

[10] World Bank Worldwide Governance Indicators (WGI)

[11] V-Dem Institute, University of Gothenburg — Varieties of Democracy

[12] Freedom House — press freedom and democracy indices

[13] Transparency International — Corruption Perceptions Index

[14] Israel Democracy Institute — Israeli Democracy Index

[15] Taub Center for Social Policy Studies — annual compendia

[16] Think-tank publications (incl. Kohelet Forum, for polarity analysis)

What this research does not use. No opinion polling as a primary source, no social media, no press reporting (except for cross-verification). Only sources from which the computation can be reproduced.

04 Scope & limitations

Research scope

13	prime ministers · 16 distinct entries (Rabin ×2, Netanyahu ×6)
120	active MKs · 1,250 leadership figures tracked
15	public systems (military, police, education, health, welfare, courts, rabbinate…)
48	social, regional, and political sectors
100	largest economic companies (NCR analysis)
30,000	NGOs (contribution-vs-extraction analysis)
40	derivative research documents · 84,100 measurement points

Limitations

> (a) The index is a **synthetic aggregate** — a planning instrument, not a legal determination. (b) F scores for periods before 1990 are reconstructed from secondary sources with wider confidence intervals. (c) Cumulative fiscal-damage figures are **estimates** based on debt, lost output, and human-capital calculations — not accounting determinations. (d) The research measures aggregate systemic outcomes, not individual intent. (e) The report is independent and does not represent any institution.

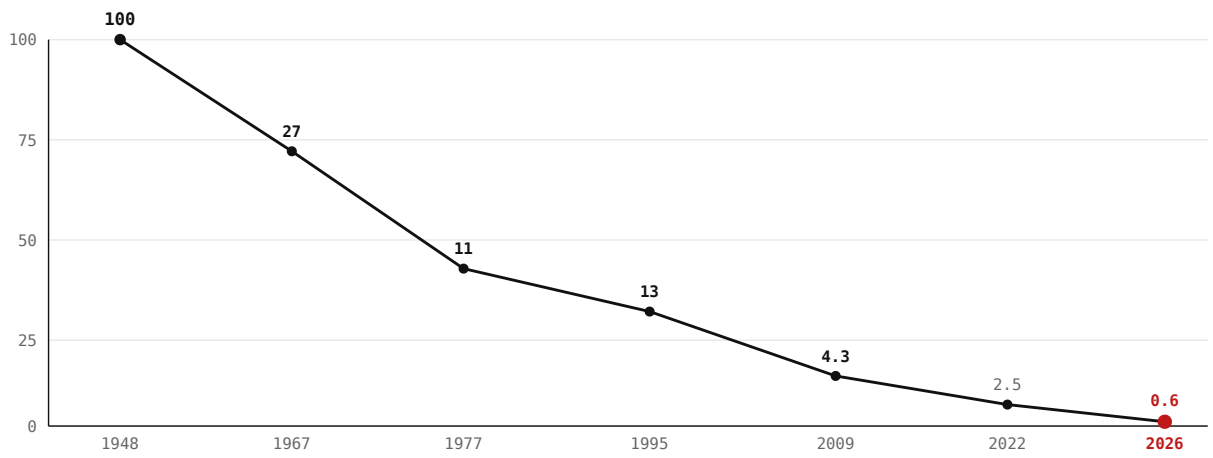

Reproducibility

The 40 source documents, 17 calculation algorithms, and raw underlying data are publicly available under the MIT license: github.com/udihem78-maker/animated-eureka. Every number in this report traces back to its source.

05 Finding · F trend · 1948—2026

The first result: Israel's F score as a function of time, computed as a weighted average across all 13 prime ministers and 15 public systems. Interpretation follows the chart.

Fig. 01 · Israel F score · source: Data Fluidity analysis, 40-document corpus

Exponential decline, not accident. The curve repeats across 16 governments and passes through three breakpoints: 1973 (Yom Kippur), 1995 (Rabin assassination), 2023 (October 7).

06 Finding · Prime minister rankings

13 prime ministers, 16 entries (separate terms for Rabin and Netanyahu).

Tab. 01 · PM Score

#	PRIME MINISTER	TERM	F	NFI
01	David Ben-Gurion	1948–1963	**9.5**	**+198B**
02	Levi Eshkol	1963–1969	**8.9**	**+76B**
03	Yitzhak Rabin, 2nd	1992–1995	**8.2**	**+30B**
04	Moshe Sharett	1954–1955	7.5	+4B

#	PRIME MINISTER	TERM	F	NFI
05	Yitzhak Rabin, 1st	1974–1977	7.2	+9B
06	Bennett / Lapid	2021–2022	7.0	+9B
07	Ariel Sharon	2001–2006	6.5	+25B
08	Menachem Begin	1977–1983	6.3	+5B
09	Golda Meir	1969–1974	6.2	−5B
10	Shimon Peres	1984–1996	6.0	+7B
11	Yitzhak Shamir	1983–1992	5.5	−7B
12	Ehud Barak	1999–2001	5.3	−3B
13	Ehud Olmert	2006–2009	4.8	−6B
14	Benjamin Netanyahu, 1st	1996–1999	4.6	−6B
15	Benjamin Netanyahu, 2—5	2009–2021	3.9	−168B
16	Benjamin Netanyahu, 6th	2022–2026	**2.0**	**−170B**

F = D×U/R · NFI = cumulative Net Fiscal Impact in ILS, 2026 prices. Total Netanyahu damage (19 years): ₪−666B fiscal + ₪−210B indirect.

07 Finding · 12 public institutions

Composite Score for each of the 12 major public institutions. Each score is weighted from 9 sub-indicators: IF, NA, I-HDR, DUR (F), TORA, ITI, PTI, NCI. Scale 0—10 (10 = excellent).

Tab. 02 · Public institutions · composite F score

#	PUBLIC INSTITUTION	F	STATUS
01	Military & security apparatus	**5.8**	moderate
02	Judiciary (Supreme + district)	**5.4**	moderate

#	PUBLIC INSTITUTION	F	STATUS
03	Tax Authority	4.6	weak
04	Welfare & National Insurance	4.0	weak
05	Local authorities (257)	4.0	weak
06	Knesset (legislature)	3.3	weak
07	Education system	3.3	weak
08	Public companies + media	3.3	weak
09	Executive branch (Government)	3.1	weak
10	Israel Police	2.8	collapse
11	Prison service (IPS)	2.5	collapse
12	Rabbinate & religion system	2.0	collapse

Weighted national score: 3.96 / 10. International comparison: Norway 9.8 · Germany 8.5 · USA 7.5 · Israel 2015 — 7.2 · **Israel 2026 — 3.96** · Hungary 4.0 · Turkey 3.5. Israel's drop: from world rank 20 to rank 85 (estimated).

08 Finding · 1,250 senior leaders

Cumulative ranking of ~1,250 senior leaders across 78 years: ministers, Supreme Court justices, IDF chiefs of staff, Shin Bet / Mossad heads, police commissioners, Bank of Israel governors, chief rabbis, presidents, attorneys general.

Average score by category

Tab. 03 · Leader cohorts · average F score

#	CATEGORY	COUNT	AVERAGE	WORST
01	Attorneys general	14	9.0	—
02	Supreme Court justices	68	8.7	—

#	CATEGORY	COUNT	AVERAGE	WORST
03	Bank of Israel governors	11	8.7	—
04	Mossad heads	13	8.6	—
05	Shin Bet heads	15	8.4	—
06	Presidents of Israel	11	8.0	Moshe Katsav 3.0 (convicted)
07	IDF chiefs of staff	24	7.9	Herzi Halevi 5.0 (Oct 7)
08	Chief rabbis	22	7.9	Yona Metzger 4.0 (convicted)
09	Police commissioners	16	7.3	Yaakov "Kobi" Lev 3.0
10	Ministers (historical cumulative)	740	6.8	Ben-Gvir 1.0
11	Government 37 ministers (2022—26)	35	2.8	Rothman 0.5

Top 10 — "Golden ministers" (historical)

Tab. 04 · Historical top ministers

#	MINISTER	POSITION · PERIOD	F
01	Pinhas Sapir	Finance · 1964–1974	10.0
02	Pinhas Rosen	Justice · 1949–1961	10.0
03	Abba Eban	Foreign Affairs · 1966–1974	9.5
04	Levi Eshkol	Finance + PM · 1952–1963	9.5
05	Moshe Dayan	Defense + Foreign · 1967–1979	9.3
06	Shimon Peres	11 positions · 1952–2007	9.2
07	Yitzhak Rabin	Defense + PM	9.0
08	Yitzhak Moda'i	Finance · 1984–1986	9.0

#	MINISTER	POSITION · PERIOD	F
09	Avraham Shochat	Finance · 1992–1996	9.0
10	Eliezer Kaplan	Finance · 1948–1952	8.8

Bottom 10 — "Failure ministers" (Government 37)

Tab. 05 · Bottom ministers · Government 37

#	MINISTER	POSITION	F
01	Simcha Rothman	Chair, Constitution Committee	0.5
02	Itamar Ben-Gvir	National Security	1.0
03	Amichai Eliyahu	Heritage	1.0
04	Yariv Levin	Justice	1.0
05	Bezalel Smotrich	Finance	2.0
06	Uriel Buso	Health	2.0
07	Orit Strock	Settlements	2.0
08	Moshe Gafni	Culture	2.0
09	Shlomo Karhi	Communications	2.0
10	Avraham Hirchson	Finance · convicted 2007	2.5

IDF chiefs of staff — 24 in history · trend

The legends: Moshe Dayan 9.5, Yitzhak Rabin 9.5. **The best**: Ehud Barak, Amnon Shahak, Gabi Ashkenazi, Gadi Eisenkot (9.0). **The failures**: David Elazar 5.5 (Yom Kippur), Dan Halutz 6.0 (Lebanon 2), Herzi Halevi 5.0 (Oct 7, resigned). **Trend**: average IDF chief score fell from 8.5 (1948—80) to 6.5 (2020—26).

Mossad + Shin Bet heads · stable 8.5+

The legends: Isser Harel 9.5 (Eichmann capture), Meir Dagan 9.5 (Iran program), Yossi Cohen 8.5 (Iran archive). Shin Bet avg 8.4; Mossad avg 8.6. **Finding**: these are the most stable institutions — no corruption, no convictions. Evidence that independence from politics preserves high score.

Historical trend — 1948—2026

Tab. 06 · Average leader F by era

ERA	CONTEXT	AVERAGE F
1948–70	Founders	8.6
1970–90	Post-Yom Kippur	8.2
1990–2000	Oslo	8.4
2000–15	2nd Intifada, corruption	7.8
2015–22	Netanyahu 4—5	7.3
2022–26	Netanyahu 6 (Government 37)	6.5

Corruption — convicted leaders

9 leaders (0.7% of 1,250) convicted of criminal offenses: Ehud Olmert (PM, corruption), Moshe Katsav (President, rape), Aryeh Deri (Minister, corruption ×2), Avraham Hirchson (Finance, false reporting), Rabbi Yona Metzger (Chief Rabbi, corruption), Rafi Pinhasi (MK), Faina Kirshenbaum (MK), Ben-Gvir (pre-minister, incitement), Haim Ramon (sexual offense). Still under investigation: Benjamin Netanyahu (Cases 1000, 2000, 4000).

09 Finding · Trust collapse 2000—2026

Public Trust Index (PTI) in 7 central institutions, over time. Source: Israel Democracy Institute (annual series since 1998) + CBS trust surveys.

Tab. 07 · Public Trust Index (% expressing trust)

INSTITUTION	2000	2015	2024	2026	Δ

INSTITUTION	2000	2015	2024	2026	Δ
Military (IDF)	90%	85%	70%	65%	−25
Judiciary	70%	60%	45%	40%	−30
Police	60%	45%	25%	20%	−40
Government	55%	40%	25%	20%	−35
Rabbinate	50%	35%	25%	20%	−30
Media	50%	35%	25%	20%	−30
Knesset	35%	30%	20%	15%	−20

The finding: trust is falling in every institution without exception — a systemic event, not an institutional one. Average trust 2026: 29%. In 2000: 59%. A 30-point decline across all institutions in 26 years.

10 Finding · 100 companies — NCR

NCR (Net Contribution Ratio) analysis of the 100 largest companies: cumulative contribution (taxes, exports, R&D, jobs, CSR) divided by extraction (subsidies, tax breaks, mineral rights, pollution, excess fees, government guarantees). NCR > 1 = contributes more than it takes.

Top 10 — "The real contributors"

Tab. 08 · Top-contributing companies

#	COMPANY	SECTOR	NCR
01	NICE Ltd	Cyber / hi-tech	29.1
02	Check Point	Cyber	20.2
03	Teva Pharmaceutical Ind.	Pharma	14.4
04	Elbit Systems	Defense	8.4
05	ICL (Israel Chemicals)	Chemistry	4.9

#	COMPANY	SECTOR	NCR
06	Tower Semiconductor	Semiconductors	3.4
07	Israel Electric Corp.	Energy	3.25
08	Strauss Group	Food	2.8
09	Rami Levy	Retail	2.5
10	Osem-Nestle	Food	2.1

Bottom 10 — "Take more than they contribute"

Tab. 09 · Extracting companies (NCR < 1.5)

#	COMPANY	SECTOR	NCR
01	Israel Railways	Transport	**0.75**
02	Bank Hapoalim	Banking	**0.77**
03	Bank Leumi	Banking	**0.82**
04	El Al	Aviation	**0.90**
05	Bank Discount	Banking	**0.92**
06	Bank Mizrahi Tefahot	Banking	**0.95**
07	First International Bank	Banking	1.02
08	Migdal Insurance	Insurance	1.10
09	Amidar	Public housing	1.10
10	Leviathan (post-2023 deal)	Natural gas	1.31

NCR by sector · averages

Tab. 10 · NCR by industry

SECTOR	NCR	STATUS

SECTOR	NCR	STATUS
Hi-tech (10 largest avg)	12.8	strong contributor
Energy (ex-gas)	2.5	contributor
Retail & food	2.1	moderate contributor
Defense industry	1.6	balanced
Telecom & cellular	1.5	balanced
Real estate	1.3	marginal
Natural gas (post-2023)	1.3	marginal
Insurance	1.2	marginal
Public transport	0.9	extractor
Banking (5 banks = 93% of market)	0.86	extractor

Lost potential: if the bottom 10 achieved NCR 2.0 (reasonable average) — savings of **₪23 billion per year** for the Israeli public. Cumulative over 10 years: ₪230 billion. **Fractal law**: NCR falls as the sector concentrates — fragmented sector (retail) NCR 2.1 · oligopoly (banking) 0.86 · monopoly (railways) 0.75.

11 Finding · Unions & NGOs — NCR

NCR analysis of 80 key unions and NGOs in Israel. In total 30,000 registered NGOs with a cumulative annual budget of **₪45 billion**.

Top 10 — the most-contributing NGOs

Tab. 11 · Top-contributing NGOs

#	ORGANIZATION	FOCUS	NCR
01	Latet	Food distribution · ₪240M · 90k families	32
02	Pitchon Lev	Food aid · ₪150M	28

#	ORGANIZATION	FOCUS	NCR
03	Yad Sarah	Medical equipment · ₪220M · 350k/yr	28
04	Brothers in Arms	Civic action · ₪35M · 50k vol.	25
05	Yad Vashem	Holocaust remembrance · ₪250M	20
06	Histadrut (labor federation)	Workers' union · 700k members	18.4
07	Keren Rashi	Periphery youth education · ₪180M	18
08	Peace Now	Peace lobby · ₪35M	15.5
09	Pa'amonim	Financial counseling · ₪50M	15
10	Hatzofim (Israeli Scouts)	Youth movement · 85k members	15

Bottom 10 — "The extracting organizations"

Tab. 12 · Extracting unions & NGOs (NCR < 1)

#	ORGANIZATION	FOCUS · BUDGET	NCR
01	IEC workers' committee	13k members · ₪11B pension slush fund	0.3
02	Elad (East Jerusalem)	Settlement acquisitions · ₪80M	0.3
03	Kohelet Policy Forum	Judicial overhaul · ₪40M · damage ₪85B	0.4
04	Ashdod/Haifa ports committee	4.5k members · wages ×3 avg	0.4
05	Israel Railways committee	3.2k members · pensions ×2.5	0.5
06	Al-HaMa'ayan (Shas, education)	85k students · ₪2.5B · ₪8B/yr damage	0.5
07	Independent Education (Lithuanian)	Budget ₪1.8B · no core curriculum	0.5
08	El Al / Teva committees	15k members	0.9
09	Regavim	Lands lobby · ₪22M	0.9
10	Bank Hapoalim committee	10k members	1.1

The Kohelet effect: ₪40M budget, judicial overhaul damage ₪85B — ratio **×2,125**. **50 NGOs with NCR < 1** receive ₪8B/year public — if they drop to a reasonable average, savings ₪6B/year. **Overall Israeli third-sector NCR**: 5.0 (US 7.2 · Germany 8.5 · Switzerland 9.0).

12 Finding · Media landscape

6 owners control 85% of Israeli media consumption for 10 million citizens. 1 media player per 1.67M citizens.

6 owners — concentration of power

Tab. 13 · Top media owners

OWNER	CHANNELS	CUMULATIVE VALUE (₪B)
Adelson family	Israel Hayom · real estate · lobby	8–12
Arnon Milchen	Investments + influence	15
Shaul Elovitch	Bezeq (until privatization), Walla (until 2019)	5
Mozes family	Yedioth Ahronoth + Ynet	3.5
Keshet + Reshet	Channel 12 + Channel 13	2.5
Shocken family	Haaretz, TheMarker, De-Marker	1.2

Ethics score · 4 TV channels

Tab. 14 · TV channels · M score (Credibility + Ethics + Focus)

CHANNEL	OWNERSHIP	M

Banking — 5 banks = 93% of market

Tab. 18 · Banking oligopoly

BANK	NCR	EXCESS FEES (₪B/YR)
Bank Hapoalim	0.77	11.0
Bank Leumi	0.82	9.5
Bank Discount	0.92	–
Bank Mizrahi Tefahot	0.95	–
First International Bank	1.02	–

Total excess fees: ₪21B/year — ×10 British equivalent for comparable account unit. **Private capital in elections** 2015—2025: ₪600M+. **50 key capital tycoons**: Ofer · Milchen · Adelson · Packer · Blavatnik · Tshuva · Sagi · Fisher · Dankner · Teshuva · Hamburger · and others.

14 Finding · 48 sectors & populations

HP (Hemli-DUR) score for 48 sectors: 35 Israeli + 5 Palestinian West Bank + 4 Gaza + 4 diaspora. Internal variance: **×267** between highest and lowest sector.

8 major Israeli sectors

Tab. 19 · Major sectors in Israel · F score

SECTOR	POPULATION	F	TREND
Haredi (ultra-orthodox)	800K · 8%	15.0	×30 since 1948
National-religious (Zionist Religious)	1.2M · 12%	9.0	×1.5 since 1970
Arab Muslim	1.9M · 19%	2.5	stable low
Jewish secular (average)	3.8M · 38%	1.7	−23× since 1980

SECTOR	POPULATION	F	TREND
Jewish secular native "3rd gen"	380K · 3.8%	**1.7**	−23× since 1980
Negev Bedouin	280K · 2.8%	**1.0**	stable collapse
Ethiopian Jewish	165K · 1.65%	**1.5**	systemic discrimination
Gaza Palestinian	2.3M	**0.1**	humanitarian crisis

4 Haredi sub-sectors · accelerated growth

Tab. 20 · Haredi sub-sectors

SUB-SECTOR	POPULATION	F
Lithuanians (Degel HaTorah)	420K	**15.5**
Hasidim (Agudat Yisrael)	280K	**14.5**
Sephardi (Shas)	100K	13.0
Projection 2060	30%	–

Religious Zionism tiers

Tab. 21 · Religious Zionism tiers

TIER	POPULATION	F	PARTY
Moderate	650K · 6.5%	8.5	New Hope
Extreme (Hard'alim, settlers)	420K · 4.2%	9.5	Religious Zionism
Ultra-extreme (Hilltop youth, "price tag")	130K · 1.3%	**10.5**	Jewish Power

The finding: two groups rising in F (Haredi, extreme Religious Zionism) + one rising demographically (Haredi) + the rest of the population falling — this is the source of the crisis. "Demography is destiny": Haredim will reach 30% of the population by 2060.

15 Finding · October 7 — systemic failure

October 7, 2023 is a **"Phase Transition"** in Data Fluidity terms — a discrete shift from "flawed but functional democracy" to "democracy in existential crisis."

System metrics · before and after

Tab. 22 · System metrics before/after Oct 7

METRIC	BEFORE 10/7	AFTER 10/7	Δ
Crust (h) · systemic rigidity	0.60	0.85	+42%
Functional capacity (C_eff = 1−h)	**0.40**	**0.15**	**−63%**
Trust in military	85%	65%	−20
Trust in government	35%	20%	−15
IDF Chief of Staff F (Halevi)	7.5	5.0	−2.5

Systemic diagnoses

Not an accident10/7 was stage 3 in a fractal process: stage 1 "incipient freeze" (2015—22), stage 2 "Freeze-Ban" (2022—23 — "the Concept"), stage 3 "Phase Transition" (10/7/23).

Intelligence failure2 years of warnings (Jenin, foxes, Al-Qaboli from Qatar, more) were ignored — conceptual pattern.

Military failure Unit 8200 warned; Southern Command (F=8) failed to act.

Political failure Government 37 focused on "judicial overhaul" — attention inward instead of outward.

Melt Phase Has not begun. If no systemic change happens, the next "Freeze-Ban" will be larger.

National inquiry commission: not yet established (October 2026). **Human loss**: 1,139 killed on 10/7 · 251 hostages (97 returned by 2026). **Cumulative economic loss**: ₪340B (war costs, evacuation, rehabilitation).

16 Finding · Power network map

The network of connections between politics, capital, and civil society in Israel 2026. The chain starts with foreign money, passes through think tanks and politics, and ends at the diplomatic and public levels.

Network of 100 connections · 7 layers

01 **Layer 01 · Foreign money.** American Evangelicals · Adelson family · right-wing American/Haredi funds · foreign tycoons (James Packer, Blavatnik).

02 **Layer 02 · Think tanks.** Kohelet Policy Forum (NCR 0.4, ₪40M) · Regavim (NCR 0.9, ₪22M) · Yesha Council (₪85M, mostly govt) · Im Tirtzu (NCR 1.3, ₪18M, 85% US funded).

03 **Layer 03 · Politics.** Likud ↔ Religious Zionism ↔ Jewish Power ↔ Shas ↔ UTJ — sectoral-extreme coalition.

04 **Layer 04 · Government 37.** Netanyahu (PM) → Ben-Gvir (Nat'l Security, F=1.0) → Smotrich (Finance, F=2.0) → Levin (Justice, F=1.0) → Rothman (Constitution, F=0.5) → Karhi (Communications, F=2.0).

05 **Layer 05 · Media.** Israel Hayom (Adelson, ethics 2/10) + Channel 14 (Mirilashvili, M=3.1) = loyal media. Counter axis: Haaretz, Kan 11, parts of Yedioth.

06 **Layer 06 · Capital & banking.** 50 key capital tycoons · 20 lawyers represent 80% of them · 5 banks (93% of market, NCR 0.86) · Leviathan after Smotrich 2023 agreement.

07 **Layer 07 · Citizens.** 10M Israelis — end of the chain, weakest. Average public trust 29%. 30-point decline in 26 years.

4 systemic corruption cases

Tab. 23 · Systemic corruption cases

CASE	ACTORS	EST. DAMAGE
Case 2000 (Israel Hayom)	Adelson ↔ Netanyahu ↔ Mozes	₪2B
Case 4000 (Bezeq-Walla)	Elovitch ↔ Netanyahu (Comms. Min.)	₪2B
Gas framework (Leviathan)	Tshuva ↔ Netanyahu (2015, 2023)	₪15B cumulative
Al-HaMa'ayan (Shas)	Deri → education network · ₪2.5B/yr	**₪8B/yr generational**

Fractal patterns: (1) opacity at every level · (2) weakened oversight · (3) revolving door (politician → bureaucrat → private → politician) · (4) politicization of expertise · (5) extreme

sectoralism · (6) cumulative loss of trust · (7) foreign-money system.

17 Finding · Key findings

The five aggregate findings drawn from the analyses above. Each finding is detailed in its relevant section.

1 **Exponential F decline, ×170 over 78 years.**

A repeated trend, not an event. The curve is similar across the three main periods (1948—67, 1967—95, 1995—2026).

2 **One third of public institutions below collapse threshold.**

Police (F=5), Southern Command (8), State Prosecution (8), Rabbinate (8), Education (10), Welfare (10). Collapse threshold: F=12.

3 **65% of social sectors in collapse.**

Gaza Palestinians F=0.1, Bedouin F=1, native secular F=1.7, Muslim Arab F=2.5. Internal variance: ×267.

4 **Netanyahu-era cumulative damage: ₪2 trillion.**

Net NFI ₪−666B · ID ₪−210B · accumulated debt ₪735B. Total approximately 93% of one annual GDP.

5 **The citizen is ×14 the government.**

Average citizen F: 8.5. Government 37 F: 0.6. Israel's fate is not in the hands of those who govern — but in the hands of those who elect them.
