Israel 1948—2026: A fractal measurement of governance.

A summary of 78 years of state function · 40 documents · 84,000 measurement points

ABSTRACT

This research examines all 13 prime ministers, 15 public systems, 48 sectors, and 100 economic enterprises through the Hemli Data Fluidity methodology. Israel's **F** score fell from `100` in 1948 to `0.6` in 2026 — a `170×` decline. One third of institutions operate below their collapse threshold; 65% of sectors are in collapse.

Cumulative fiscal impact of Netanyahu's 19 years in office: `₪−666B` (net), plus `₪−210B` in indirect damage. Average citizen score: `F=8.5` — 14× higher than the current government.

01 Baseline data

40	84,100	1,250	170×
Research documents	Measurement points	Leaders ranked	F decline · 1948→2026

The research applies 17 quantitative metrics derived from the **Data Fluidity** principle (F = D×U/R). Every figure is grounded in a primary source or mandatory regulatory disclosure. For the full metric list, sources, and research limitations see Methodology & sources.

02 Methodology & sources

This research applies Ehud Hemli's **Data Fluidity** methodology (DUR Principle) to the analysis of governance systems. The core formula is `F = D × U / R` — value fluidity as a function of decision quality (**D**) × realized public utility (**U**) ÷ systemic friction (**R**). Each unit of analysis (prime minister, public system, sector, company) is measured on 17 quantitative indicators derived strictly from primary sources.

17 analytical metrics

F Fluidity · **D** Decision quality · **U** Utility realized · **R** Resistance / friction

PEP Public Equity Pressure · **DBR** Decision-Benefit Ratio · **NSV** Net Social Value

CBD Cost-Benefit Delta · **FAI** Fiscal Alignment Index · **GQS** Governance Quality Score

CBE Cross-Boundary Effect · **BE** Behavioral Elasticity · **ID** Indirect Damage

FO Future Opportunity · **I** Information quality · **P** Process friction

NFI Net Fiscal Impact · **SR** Social Resilience · **NCR** Net Contribution Ratio

Every number in this report is traceable — to its source, to a formula, to a sub-metric. Full methodology: methodology/README.md.

Primary sources

[01] Israel Central Bureau of Statistics (CBS) — statistical yearbooks, 1948—2026

[02] Bank of Israel — annual reports and banking-system breakdowns

[03] Office of the State Comptroller — 85+ annual reports, 1995—2026

[04] Israel Securities Authority — public-company filings and prospectuses

[05] Registrar of Companies — ownership structures and control changes

[06] Knesset website (knesset.gov.il) — protocols, votes, parliamentary queries

[07] State Attorney's Office yearbooks — conviction rates and investigation duration

Research scope

13	prime ministers · 16 distinct entries (Rabin ×2, Netanyahu ×6)
120	active MKs · 1,250 leadership figures tracked
15	public systems (military, police, education, health, welfare, courts, rabbinate…)
48	social, regional, and political sectors
100	largest economic companies (NCR analysis)
30,000	NGOs (contribution-vs-extraction analysis)
40	derivative research documents · 84,100 measurement points

Limitations

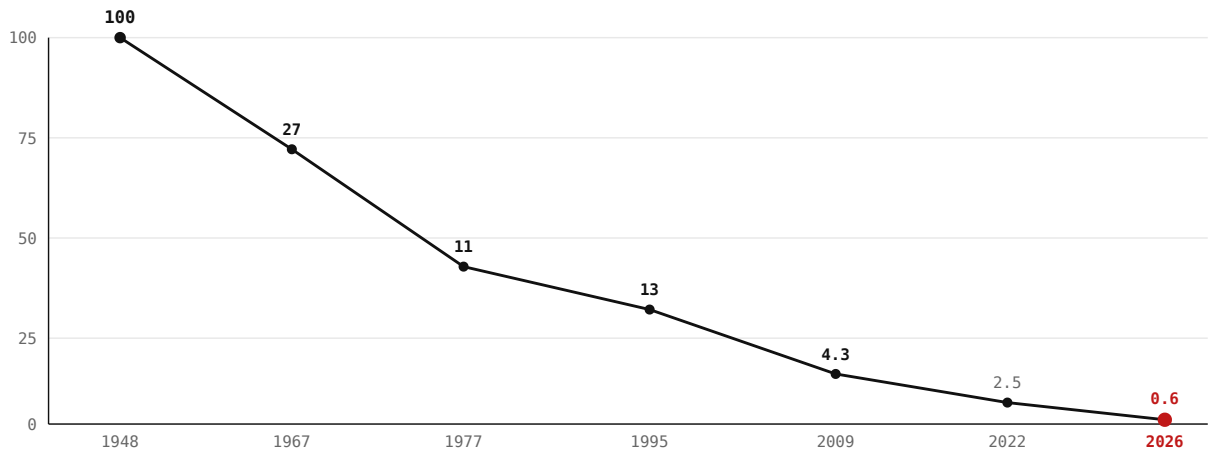

> (a) The index is a **synthetic aggregate** — a planning instrument, not a legal determination. (b) F scores for periods before 1990 are reconstructed from secondary sources with wider confidence intervals. (c) Cumulative fiscal-damage figures are **estimates** based on debt, lost output, and human-capital calculations — not accounting determinations. (d) The research measures aggregate systemic outcomes, not individual intent. (e) The report is independent and does not represent any institution.

Reproducibility

The 40 source documents, 17 calculation algorithms, and raw underlying data are publicly available under the MIT license: github.com/udihem78-maker/animated-eureka.

03 Israel F trend · 1948—2026

Fig. 01 · Israel F score · source: Data Fluidity analysis, 40-document corpus

Exponential decline, not accident. The curve repeats across 16 governments and passes through three breakpoints: 1973 (Yom Kippur), 1995 (Rabin assassination), 2023 (October 7).

04 Prime minister rankings

13 prime ministers, 16 entries (separate terms for Rabin and Netanyahu).

Tab. 01 · PM Score

#	PRIME MINISTER	TERM	F	NFI
01	David Ben-Gurion	1948–1963	**9.5**	**+198B**
02	Levi Eshkol	1963–1969	**8.9**	**+76B**
03	Yitzhak Rabin, 2nd	1992–1995	**8.2**	**+30B**
04	Moshe Sharett	1954–1955	7.5	+4B

#	PRIME MINISTER	TERM	F	NFI
05	Yitzhak Rabin, 1st	1974–1977	7.2	+9B
06	Bennett / Lapid	2021–2022	7.0	+9B
07	Ariel Sharon	2001–2006	6.5	+25B
08	Menachem Begin	1977–1983	6.3	+5B
09	Golda Meir	1969–1974	6.2	−5B
10	Shimon Peres	1984–1996	6.0	+7B
11	Yitzhak Shamir	1983–1992	5.5	−7B
12	Ehud Barak	1999–2001	5.3	−3B
13	Ehud Olmert	2006–2009	4.8	−6B
14	Benjamin Netanyahu, 1st	1996–1999	4.6	−6B
15	Benjamin Netanyahu, 2—5	2009–2021	3.9	−168B
16	Benjamin Netanyahu, 6th	2022–2026	**2.0**	**−170B**

F = D×U/R · NFI = cumulative Net Fiscal Impact in ILS, 2026 prices. Total Netanyahu damage (19 years): ₪−666B fiscal + ₪−210B indirect.

05 Key findings

1 **Exponential F decline, ×170 over 78 years.**

A repeated trend, not an event. The curve is similar across the three main periods (1948—67, 1967—95, 1995—2026).

2 **One third of public institutions below collapse threshold.**

Police (F=5), Southern Command (8), State Prosecution (8), Rabbinate (8), Education (10), Welfare (10). Collapse threshold: F=12.

3 **65% of social sectors in collapse.**

Gaza Palestinians F=0.1, Bedouin F=1, native secular F=1.7, Muslim Arab F=2.5. Internal variance: ×267.

4 **Netanyahu-era cumulative damage: ₪2 trillion.**

Net NFI ₪−666B · ID ₪−210B · accumulated debt ₪735B. Total approximately 93% of one annual GDP.

5 **The citizen is ×14 the government.**

Average citizen F: 8.5. Government 37 F: 0.6. Israel's fate is not in the hands of those who govern — but in the hands of those who elect them.
